EXPERIENCE

Backend Developer @ CDATS

JANUARY 2020 - MAY 2020

- Worked on a website for the university's chemistry department alongside a group of developers.
- Worked on an SQL database and PHP based server script to add new instruments and respective functionalities in the database and the web-application.
- Fixed some major bugs in the website.

Mentor and Teaching Assistant @ Coding Ninjas

June 2021 - Present

- Mentored a group of more than 20 students who took up a course of Data Structures and Algorithms in Python
- Solved doubts and debugged codes written by students.
- Taught them various DSA topics and cleared their doubts regarding those topics.

PROJECTS

Airline Booking Website(Flyver)

A dummy flight booking website made using express and node.js.

Link: <https://flyver.herokuapp.com>

Neuro-Evolutionary Dino

A neuro-evolutionary dino which uses the NEAT algorithm to evolve over time and generations and learns to avoid the obstacles in its path.

Link: https://github.com/pranav-ml/Chome_Dino_AI_NEAT

MCTS-Based 2048 Bot

A bot built from scratch which uses the MCTS algorithm to play the classic 2048 game. Link: https://github.com/pranav-ml/2048_ai

LANGUAGES

Python

C/C++

Javascript
